

TPR/PP WHEELS

Light Duty

201G GREY TREAD

Temperature Range: -10°F ~ 150°F
Hardness: 75±5 shore A

301B BLACK TREAD

Temperature Range: -10°F ~ 150°F
Hardness: 75±5 shore A

FEATURES:

These wheels are specially engineered to provide unsurpassed durability and reliability.

This premium wheel combines the durability of a hard core wheel with the quiet floor protection of a soft tread wheel.

They are made of a thermoplastic elastomer which is permanently bonded to a polypropylene core and will not mark floors.

Our wheel is resistant to most mild chemicals, acids and stems. This attractive wheel accommodates a large number of industries and a limitless number of applications.
